*To whom it may concern*

**Re: Bulugaya Engineering – Talon Design Hardware.**

Bulugaya Engineering cc is a proudly South African manufacturer of bullet resistant Cash in Transit vehicles. It is our mission statement to maintain our status as the premiere, preferred provider of turn-key armoured vehicle solutions to all notable cash- in- transit companies in both South Africa and Sub-Saharan Africa

In order to safeguard our much esteemed industry reputation for excellence, our technology collaborators are key to our continued success:

Talon Design Hardware is our preferred provider of the ultra-high security locking devices integrated into our overall vehicle security protocol. We have a long- established relationship with the company and have come to value both their capacity of qualitative manufacture and product innovation/adaption as necessitated by dynamic market trends.

The Slam 4 has consistently proven itself as a robust, resilient locking device and continues to inspire confidence with the longevity of its performance in the field. Attendant product characteristics of superlative shear strength, in excess of 4 tonnes, as well as an exceptionally durable external aesthetic finish, authenticates its tried and true reputation.

Bulugaya Engineering cc has no hesitation in recommending Talon Design Hardware and the Slam 4 locking device to the armoured industry. The product is especially endorsed to those service providers to whom it is paramount to comply with the most demanding of high security mandates.

We trust that the above would meet with your approval. Please feel free to contact us if we could be of any further assistance.

Thanking you

J.J. Engelbrecht
